SHAIK SHAHABAZ

Hyderabad, India | shahabaz.shaik812@gmail.com | +91 9381004512

PROFESSIONAL SUMMARY

AI Full-Stack Developer with approximately 2 years of experience working on the EZSTAF recruitment platform, contributing to AI-enabled features and full-stack application development. Experienced in integrating a Mistral-based chatbot with MCP tools, implementing AI candidate matching using embeddings and vector search, and developing AI-powered resume and profile workflows. Skilled in Python, FastAPI, Flutter, PostgreSQL, and REST API integration, with hands-on experience in debugging, code refactoring, testing, and using AI-assisted development tools to improve development efficiency.

TECHNICAL SKILLS

AI & LLM Applications	LLM integration, LLM chatbot workflows, prompt design, MCP tool integration, AI workflow debugging
AI-Assisted Development	Vibe coding, prompt-driven development, AI-assisted code generation, codebase analysis, rapid prototyping, debugging, refactoring, test preparation, script development, technical documentation
AI & Semantic Search	Sentence Transformers, text embeddings, semantic similarity, Pinecone vector search, candidate retrieval and scoring
Backend & Frontend	Python, FastAPI, Flutter
Database & Data	PostgreSQL, MySQL, Snowflake, Neon DB, data seeding, data validation
Tools	Git/GitHub, Postman, Swagger UI, DBeaver, Git Bash

PROFESSIONAL EXPERIENCE

Nevonex, Hyderabad **Oct 2024 – Present**
AI Full Stack Developer

- Developed a full-featured Applicant Management System to streamline end-to-end recruitment and hiring workflows.
- Integrated an LLM-powered chatbot for both recruiters and applicants using Mistral and MCP servers, enabling the chatbot to access tools relevant to recruitment workflows.
- Worked on AI job-matching and candidate-matching workflows using retrieval-augmented generation (RAG), Sentence Transformers embeddings, and the Pinecone vector database to retrieve and rank relevant candidates.
- Developed and integrated REST APIs using FastAPI, supporting application workflows and communication between the frontend and backend, with request/response data handled through defined JSON contracts.
- Worked with complex PostgreSQL schemas and table relationships, including foreign-key dependencies, to support consistent data retrieval and reliable connections across recruitment-related entities.
- Implemented Flutter/Dart frontend integrations following the project's layered architecture, and used Neon PostgreSQL, Elasticsearch for global search, Git/GitHub and Git Bash for version-control workflows, and Postman for API testing.

EDUCATION

Sri Venkateswara University, Tirupati **2021**
B.Sc. in Mathematics, Electronics and Computer Science | **Percentage: 76%**
